75mg/kg, Cupric sulphate pentahydrate 30mg/kg,  
Manganoous oxide 70mg/kg, Zinc sulphate monohydrate  
350mg/kg, Zinc chelate of amino acids hydrate 350mg/kg,  
Sodium selenite 0.45mg/kg Carrotine 135mg/kg

# THE HEIGHTS FARM STORY...

A family run business situated on the hilly outskirts of Bolton, Lancashire, Heights Farm Premium Pet Foods is an exciting, established company offering some of the highest quality pet foods and natural treats available in the market place today, with a considerable cost saving over leading brands.

Born from our own experience with animal allergies and digestive intolerances at the farm, we were only too aware that the pet food industry as a whole, driven solely by profit, is a dumping ground for "meat by-products" unfit for human consumption. Making the right choice was difficult.

At the other end of the scale the premium high street brands from pet supermarkets all came with a hefty price tag, and what made one brand better than the other? So, recognising a real need in the market place, for a premium pet food at fair price, we took the decision to commission our own range of high quality, hypoallergenic feed. The result.... Only the best 100% wholesome natural ingredients. You won't find any artificial colourings, flavourings, preservatives, wheat nor wheat gluten, dairy or soya products in our food. Fresh chicken, "grade A" chicken meal, fresh salmon or lamb meal are just some of the main ingredients that ensure our premium quality.

We have now formed a partnership here to serve these fantastic foods for your dog's delight. Stock of this range is also available, so you can drop in at a convenient time, to wind down, and buy a 15kg bag!

Kind regards,

A handwritten signature in white ink that reads "Stephen Ward".
